ABOUT

With years of combined experience within the world of industrial freezing, our team at INDUSTRIAL FREEZING ® is dedicated to making a difference for the frozen food processor.

We specialise in used freezing equipment for the food industry.

All freezers we have in stock are inspected and revised to INDUSTRIAL FREEZING ® registered standards for quality and safety based on ISO9001 Quality Management System standards: This means our job is not finished until you have received the high quality freezing solution that meets your requirements.

Our focus on quality and our eagerness to work together with our customers is the foundation for the further development, improvement and optimization of frozen food production.

We buy

We purchase industrial freezing equipment and take care of dismantling, logistics and warehousing.

We inspect

INDUSTRIAL FREEZING ® equipment that enters our facility is cleaned, inspected and prepared for installation by our skilled and dedicated technical team.

We sell

We ensure that you receive the freezing solution that you require from our extensive industrial freezing inventory. Contact us for a quotation.
